SEARCH REPORT

Applicant's or agent's file reference 6189AU1 (519885SG)		
Application No. SG 200005086-4	Application Filing Date (<i>day/month/year</i>) 07 September 2000	(Earliest) Priority Date (<i>day/month/year</i>) 10 September 1999
Applicant NEC CORPORATION		

This search report consists of a total of 5 sheets.

☐ It is also accompanied by a copy of each prior art document cited in this report.

☐ **Certain claims were found unsearchable** (See Box I)

2. ☐ **Unity of invention is lacking** (See Box II)

3. ☐ The application contains disclosure of a **nucleotide and/or amino acid sequence listing** and the search was carried out on the basis of the sequence listing

☐ filed with the application

☐ furnished by the applicant separately from the application,

☐ but not accompanied by a statement to the effect that it did not include matter going beyond the disclosure in application as filed

4. With regard to the title, ☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Office to read as follows:

5. With regard to the abstract, ☐ the text is approved as submitted by the applicant

☒ the text has been established by this Office as it appears in Box III

6. The figure of the drawings to be published with the abstract is Figure No. 5

☒ as suggested by the applicant.

☐ because the applicant failed to suggest a figure

☐ because this figure better characterises the invention

☐ None of the figures

Box III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sheet)

An XY stage comprises a base (1), a movable table (5) which is disposed on the base (1) so as to be movable in an X direction and a Y direction in an X-Y plane, and a work member (10) which is provided on the movable table (5). The XY stage further comprises: a first linear motor (6) for giving a driving force in the X direction to the movable table (5) at the same height as the centre of gravity of a movable section composed of the movable table (5) and the work member (10); and a second linear motor (7) for giving a driving force in the Y direction to the movable table (5) at the same height as the centre of the movable section. The centre-of-gravity driving ensures that substantially no moment of force is generated, and this reduces unwanted vibrations in a yawing direction.

SEARCH REPORT

Application No.

SG 200005086-4

A. CLASSIFICATION OF SUBJECT MATTER

According to International Patent Classification (IPC)

Int. Cl. ⁷ H01L 21/68, B23Q 15/24

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the search (name of data base and, where practicable, search terms used)

DWPI, /ic f16f-015/02 or h01l-021 or g03f-007/20 or g03b-027 or g12b-005/00 or g05d-003/00 or h02k-041 or b23q or g05b, (stage or table or platform or base+ or frame or holder or support or jig) (s) (motor? or engine? or driv+ or VCM or mov+ or adjust+), cent+ (s) gravity, height or level or position+ or elevation or location, driv+ or mov+ or shift+ or push+ or position+ or act+ or impart+, XY or X-Y or +direction or +axis or +coordinate? or +plane, vibrat+ or oscillat+ - +frequenc+ or +stab+ or shak+ or reciproca+ or steady

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	US 5874820 A (LEE) 23 February 1999 Abstract, figures 1-2, column 1 lines 38-41, column 2 lines 22-26 and 46-50, column 5 lines 25-49	1-3, 5, 9
X	US 5942871 A (LEE) 24 August 1999 Column 6 lines 1-3, figure 1C	1, 9

☒ Further documents are listed in the continuation of Box C

☒ See patent family annex

* Special categories of cited documents:	
"A" document defining the general state of the art which is not considered to be of particular relevance	"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"E" earlier application or patent but published on or after the international filing date	"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"O" document referring to an oral disclosure, use, exhibition or other means	"&" document member of the same patent family
"P" document published prior to the international filing date but later than the priority date claimed	

Date of submission of the request to the Australian Patent Office
